*Politics Ontologies Ecology*

# DESIGNS OF JUST TRANSITION

Emanuele Leonardi, Università di Bologna

# Two phases of Ecological Transition [from above vs from below]

1990s: labour vs. ecology ( $>$  wages =  $<$  environment)

$\Rightarrow$  Growth & Jobs treadmill)  $\Rightarrow$  Market centrality

**CLEAR FAILURE (!)**

Post-2019: labour *with* ecology / climate justice

( $>$  wages =  $>$  environment  $\Rightarrow$  profits pay the toll)

**CLIMATE FISCALITY (?)**

# Two phases of Just Transition [defensive posture vs offensive strategy]

1990s:

*Superfund for workers:* early retirement scheme, re-skilling, re-training.

Post-2019:

overarching horizon for unionism in XXI century.

«The points of convergence between workers and the climate justice movements are immense»

key issue: **workers' led design** (for products & processes)
